PROFESSIONAL PROFILE

Professional Business Analysis and Project Management with experience supporting digital transformation initiatives, gathering and documenting business requirements, developing business cases, mapping processes, coordinating cross-functional stakeholders, and supporting Agile product delivery. Experienced in translating business needs into data and technology solutions, managing backlog priorities, defining performance metrics, and supporting solutions from requirements through implementation. PMP and PSM-I certified with hands-on experience across government technology and business intelligence initiatives.

PROFESSIONAL EXPERIENCE

Project Management Specialist (Business Intelligence) – National Technology Development Program

Full-Time | Oct 2025 - Present

Key Achievements

- Built and launched the **NTDP Intelligence Products platform in Power BI**, integrating API, automated refresh, semantic models, and controlled distribution.
- Automated executive reporting using **Power BI Report Builder**, improving reporting accuracy and reducing manual effort.
- Implemented secure, role-based **“Easy Access”** through Power BI Web & Mobile, improving access while protecting sensitive program data.
- Developed **Data Quality dashboards and control checks** to identify issues, monitor quality KPIs, and support remediation.

Core Responsibilities

- Manage the end-to-end architecture, performance, maintenance, and delivery of the Power BI platform.
- Manage data governance, quality, compliance, and risk controls for NTDP Intelligence Products aligned with best-practice principles, including ISO/IEC 38505.
- Manage Power BI security using **Row-Level Security (RLS)** and DAX-based authorization across reports and datasets.
- Create and manage User Stories and Acceptance Criteria in Jira, supporting backlog prioritization, Agile delivery, stakeholder feedback, and validation of expected results.
- Gather and analyze business requirements with stakeholders, translating business questions and operational needs into analytical requirements, KPIs, insights, and solution deliverables.
- Maintain requirements traceability from stakeholder needs and business questions through defined requirements, KPIs, analytical outputs, and delivered Power BI solutions.
- Define and implement product metrics and performance KPIs, translating business requirements into analytical and technical solution designs across datasets, semantic models, reports, and platform components.

Project Management Specialist (MCIT PMO) – Ministry of Communications & Information Technology

Tamheer Internship | Dec 2024 – Jun 2025

Key Achievements

- Developed **Power BI dashboards** to provide real-time project performance insights and support management reporting.
- Created an integrated **vendor planning template** and Gantt-based Power BI timeline to improve project and vendor tracking.
- Standardized project documentation by developing templates aligned with **Program Identity guidelines**.

Core Responsibilities

- Monitored project execution, progress, and **RFP processes** across PMO initiatives.
- Supported compliance with **project management and data governance standards**.
- Analyzed project data and developed dashboards to support business and management decision-making.

Business Intelligence Specialist – Ministry of Hajj & Umrah

Collaborative Training | Mar 2024 – Jun 2024

Key Achievements

- Improved business case documentation by creating clear, structured, and visually effective materials.
- Developed **system flow diagrams in Microsoft Visio** to simplify business processes and improve stakeholder understanding.

Core Responsibilities

- Gathered and documented project requirements from stakeholders and ensured alignment with business objectives.
- Prepared business cases and supporting documentation to improve communication between business and IT teams.
- Used visual elements and basic programming logic to improve the clarity and presentation of business requirements.
- Supported the development of Business Requirements Documents (BRDs) by documenting business needs, stakeholder requirements, process flows, and expected solution outcomes.

EDUCATION

Bachelor of Business Administration | Umm Al-Qura University

Aug 2021 – Jun 2024

PROFESSIONAL CERTIFICATES AND LIECENSES

- Project Management Professional (PMP).
- Professional Scrum Master (PSM-I).
- Prep Microsoft Certified: PowerBI Data Analyst (PL-300).
- University of Colorado Agile Leadership Specialization.
- IBM AI Engineering Professional Certificate.
- IBM DevOps & Software Engineering Professional Certificate.
- IBM Data Science Fundamentals with Python and SQL.
- DevOps on AWS Specialization.

SKILLS

| Soft Skills:                                                                                                                                                                                                                                                                                     | Technical Skills:                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                        |

PROJECTS

- NTDP Intelligence Products** — Designed and implemented an integrated governed Power BI analytics platform with ETL pipelines, Modern UI/UX design, and statistical forecasting models using advanced DAX techniques.
- NTDP PMO Dashboards** – Designed and Deployed Power BI dashboards for project tracking
- NTDP Strategic Dashboards** – Built strategic – level dashboards integrating OKRs, and departmental goals.
- Project Planning Integration System** – Developed a vendor-friendly planning template and merged submissions into a centralized database with Power BI Visualization.
- DevOps Engineer Capstone Project** – Implemented CI/CD pipelines and containerized applications as part of DevOps certification.
- Image Classification with CNNs** – Trained a Convolutional Neural Network on CIFAR-10 dataset to classify categories of images
- Stock Price Prediction Using Time Series Analysis (Machine Learning)** – Forecasted stock trends using LSTM and Python libraries
